The number of empty gondola cars dispatched to the East is larger than the number of westbound loaded gondola cars. Part of the cars loaded with ore which arrive via Frankfurt/Oder are returned empty to Poland via Guben. Trains with grain which consist of 30 to 40 cars are partly composed of four-axle cars.

Comment. Compared to the last reported period, hard coal imports from Poland increased from a daily average of 150 to 225 carloads and thus reached a normal level. Grain imports from the USSR decreased from a daily average of 164 to 150 carloads.
